PROJECTS

SLIDE ME ADMIN

Year 2, Semester 1 – Year 2, Semester 2

React + Node.js + Express.js + MySQL

- Developed an admin management system for managing vehicle and service data.
- Developed RESTful APIs using Node.js and Express.js.
- Implemented CRUD operations with MySQL for data management.
- Tested APIs using Postman and documented API endpoints with Swagger.
- Integrated the backend APIs with a React frontend.

Tid_Code

Year 3, Semester 2

React + Vite + Axios + JWT + REST API

- Developed an online learning platform with REST API integration for courses, quizzes, and learning progress.
- Implemented JWT-based authentication and protected user access.
- Integrated REST APIs using Axios for user, course, quiz, and progress data.
- Implemented course enrollment, quiz scoring, progress tracking, and certificate functionality.
- Managed frontend-backend data flow and API interactions.

Tax Chatbot

Year 3, Semester 2

Python + FastAPI + FAISS + RAG

- Developed a Thai-language tax chatbot using RAG and Llama 3.
- Implemented semantic search with FAISS and multilingual embeddings.
- Developed REST APIs with FastAPI for chatbot interaction.
- Implemented query processing and document retrieval for tax-related queries.

EDUCATION

Bachelor of Computer Science & Software Innovation (CSI)

2023 - Present

Sripatum University | 4th Year Student | GPA: 3.18

SKILLS

- Programming Languages: Python, JavaScript, HTML5, CSS
- Backend & API: Node.js, Express.js, FastAPI, REST API, JWT Authentication
- Database: MySQL, MongoDB
- Tools: Git / GitHub, Postman, Docker
